Microsoft made a good decision in opening the source code of the Windows shell and access to the Remote Desktop Protocol, allowing third-party developers to bring new products and services to market. The developers who have made the Remote Desktop client (Terminals) specialize in the field of remote desktop control, which makes it a very effective and user-friendly solution that no one should overlook. With its usual Windows interface, Terminals, in fact, does not have a distinct look that might either scare off the beginner or irritate experienced users, since the interface is never in the way and the elements are quite well organized. As a control tool, Terminals allows you to take over the remote session of your chosen computer and do whatever you want, with the option to open the menus, files, folders, and more. The real advantage of this app is its ease of use and the fact that you can manage up to 30 different connections simultaneously. Making it possible to play with your own services in front of your clients, this software enables you to effortlessly deal with any situation that may arise. Some of the highlights include the following:

- Save, rename, and delete sessions;
- Edit and add sessions;
- Track your sessions by hostname, domain, username, password, and more;
- Launch sessions from your shortcuts (Favorites);
- Take control of Windows via command line arguments;
- Download and launch different applications;
- Take screenshots of your session;
- Switch between the last active sessions with tabs.

I have been a fan of the Minitaur since the first time I played the game on the PS1 in 2003. At the time it was the only officially licensed Jurassic Park game available on the PlayStation and it was a pretty decent game. The PS2 version, released in 2004, was also a pretty good game, and it included a bunch of neat dinosaurs, all of which can be unlocked by playing through the game. A fan of the Jurassic Park franchise, it was great to have so much of the Jurassic Park universe to explore in a video game. Sadly, the series declined
